New model information

AH-P372

Closed On-Ear Stereo Headphones

DENON

Portable closed On-Ear Stereo Headphones - Easy to Wear, Easy to Carry

You might not like the feel of In-Ear headphones but you may also dislike the idea of carrying around and storing large On-Ear headphones. The Denon AH-P372 is designed for easy portability. This is a light-weight and compact design, and when you aren't using them, you can easily fold them up and put them away in your bag.

Features

• Foldable for easy stowing

The acoustic sections are rotated up along the arm so that the headphones fit snugly in a bag or other storage space.

• Acoustic optimiser

Optimum acoustic characteristics are achieved by adjusting the sound pressure balance around the diaphragm.

• Left and right cable length is equal for sound quality

For improved performance, cables of equal length for both channels are used to maintain optimum sound quality.

• 0.5 m cable and 0.8 m extension cable supplied

The 0.8 m extension cable comes in handy when you carry your portable audio player in a bag.

• Gold plated stereo mini-plug

(compatible with Apple iPhone*)

• Convenient carrying pouch included

This comes with a carrying pouch as well which holds both the headphones and extension cable.
